

**Boomer** 10/15/2025 11:00 AM

im down to meet sometime  
i can do friday

1

**cahase** 10/15/2025 11:19 AM

yeah ill be free friday

October 16, 2025

**cahase** 10/16/2025 10:52 AM

im putting messages in the channel so that we have messages  
there they can check

October 17, 2025

**cahase** started a call that lasted an hour. 10/17/2025 3:21 PM

October 25, 2025

**Boomer** started a call that lasted an hour. 10/25/2025 12:59 PM

**cahase** 10/25/2025 2:15 PM

okay I should have the implementation and tests done for the actual food items and inventory done by today or tomorrow

October 26, 2025

**cahase** 10/26/2025 12:17 AM

got the backend done expect for the orders. I have tests for everything but havent run them so idk if they work will update tomorrow with my progress

**Andrew** 10/26/2025 12:18 AM

the controllers should be up and running for users, need to add deletes but the tests have good coverage.

**cahase** 10/26/2025 2:04 PM

got the github actions setup on my branch along with the backend for order, inventory, and food

**mukul** 10/26/2025 2:05 PM

Oh yeah I got the pages from the poster done

Andrew 10/27/2025 3:15 PM

Chase, I've updated the tests so that they all run locally on my User Management Branch. I changed the application.properties file (and the template), so that it's consistent with the actual main files too. However, I think this may be causing some issues with the github actions, since now we have 1 passing and 36 failing on this hopefully merged branch.

If you want, you can pull the changes and try to have them run locally on your machine too (again, update your application.properties in your test/resources folder) just as a sanity check to see that these tests actually ought to be passing.

**cahase** 10/27/2025 3:24 PM

when I run locally I get that the shouldgetuserid test fails

**cahase** 10/27/2025 3:43 PM

working on your branch right now to get everything passing

**cahase** 10/27/2025 4:12 PM

ahhhh it done now. I had to make a change in the inventoryserviceimpltests.java file that you made and changed up how the github actions runs your tests cases with the application property file

Ensured controller tests actually test the SpringBoot app. Got contro... Build & Test FoodBear #10. Pull request #2 synchronize by <a href="#">jgome2</a>	(User-Management-Tests)	1 minute ago 3N	...
Update run-tests.yml Build & Test FoodBear #10. Commit b4d5949 pushed by <a href="#">jgome2</a>	(User-Management-Tests)	1 minute ago 1m 3s	...

**cahase** 10/27/2025 4:28 PM

also talked to the prof after class and he said our poster looked great and he didnt know why we lost points for it not looking good and he said if it happens again to talk to him

**cahase** 10/27/2025 5:01 PM

@Andrew you can merge the pr now I approved and reviewed it!

**Andrew** 10/27/2025 5:07 PM

Done! Its funny, the inventoryServiceImplTests fail locally on my computer, but if it works on github then we should be fine

**cahase** 10/27/2025 5:09 PM

@mukul everything from the backend is now in dev if you want to make a pr to pull in your frontend stuff and then make a new branch to finish it off. For the Food object it has a list of strings for allergy and expects the string none for no allergy

**mukul** 10/27/2025 5:20 PM

Bet

Time to connect them

**Andrew** 10/27/2025 5:33 PM

I can handle the front end tests, like making sure entering data in forms and submitting affects the db

**cahase** 10/27/2025 5:33 PM

I'll work on expanding our backend test to have more coverage and making more of them

**Boomer** 10/27/2025 9:26 PM

if anyone wants to look at the README and License i  
created its in jrkuethe/docs branch

**cahase** 10/27/2025 9:36 PM

some badges are broke and the installing is for when we had  
the different structure (edited)

**Boomer** 10/28/2025 12:30 PM

in dev i added RUBRIC.md and that lays out everything we  
need for project 2

so i guess just put a check mark next to it when its done

1

**mukul** 10/29/2025 2:34 PM

Regarding the chatbot, r we using a gpt token

**Andrew** 10/29/2025 2:34 PM

No its all local

Boomer 10/29/2025 8:05 PM

## Project 2 Rubric

Notes	Self Assessment	Evidence
Video1	3	<a href="#">Demo video</a> (Also in README.md)
Bonus: Xfold improvement	3	<a href="#">Hosted website</a> improved the throughput and number of concurrent users
Docs: what: point descriptions of each class/function (in isolation)	3	In GitHub (before each class and function)
Use of style checkers	3	Using <a href="#">Pycodestyle</a>
Use of code formatters	3	Using <a href="#">Black</a> . Evidence of PEP8 style in GitHub python files
Use of syntax checkers	3	Using VSCode
Use of code coverage	3	<a href="#">Code Coverage</a>
Other automated analysis tools	3	Used <a href="#">Pylint</a> for static analysis of code

Andrew 10/29/2025 8:33 PM

The screenshot shows the Postman application interface. A POST request is being made to `http://localhost:8080/api/chat`. The request body is set to raw JSON with the value:

```
1 {  
2   "message": "What is our conversation about?"  
3 }
```

The response status is 200 OK, with a duration of 4.11 s and a size of 1.03 KB. The response body is displayed as:

```
1 {  
2   "response": "Right now, we're discussing **how to interact with me as a language model.**  
3   \n\nSpecifically, we're looking at:\n**Your expectations of our conversation:** You want to  
know what I'm capable of and what kind of things you'd like to do.\n**How to frame your  
question:** You want to know how to phrase your question to get the most out of me.  
4   \n\nI'm here to help with a wide range of topics, from general knowledge to specific  
questions about my capabilities. Just ask me anything!"  
5 }
```

**Boomer** 10/30/2025 11:39 AM

all the badges should be displayed in my branch

im still working on fixing the code coverage yml and badge

actually a lot of the badges wont work until merged into main  
loil

but code coverage for sure dont work

**cahase** 10/30/2025 2:29 PM

what time on the 11th works for yall to do this live demo?

**Boomer** 10/30/2025 2:35 PM

not 11-12

anytime else is fine

**cahase** 10/30/2025 2:37 PM

does that mean the one starting at 12 is a no go as well?

**Boomer** 10/30/2025 2:37 PM  
is it in person or virtual

**cahase** 10/30/2025 2:37 PM  
i would assume in person

**Boomer** 10/30/2025 2:37 PM  
then i cant do 12  
i have a app from 11-12

**cahase** 10/30/2025 2:37 PM  
okay that leaves us 10AM on the 11th

**Boomer** Yesterday at 2:55 PM  
ok all the badges are ready to go  
i created a PR and added [@cahase](#) as reviewer
